Activity Name:	Supporting children's mental health after trauma
Learning outcomes	• Identify the impacts of trauma and adversity on the developing brain and how this might affect a child's behaviour, social and cognitive functioning • Describe effective applications of preventative approaches that can reduce the likelihood of mental health and behavioural concerns developing in children at different stages of their lives • Identify individual family contexts of children and parents who present to services after trauma and ways to have helpful conversations, providing ways forward and hope.
Time spent engaged in the activity:	(including completing this form)

After watching or listening to the activity, consider the following:

1. What were three key messages that were covered in the activity?

2. Identify your learning goal and how the activity's content aligned with that goal.

3. What actions are you going to take to use the learnings to improve and/or change your practice? For example:
   - Explore the topic further in a supervision session or with a peer/colleague
   - Identify and read the latest research
   - Undertake additional courses, study or training
   - Search MHPN's webinar or podcast libraries for more PD content
   - Join an MHPN network to connect with other practitioners for networking, peer support or PD

4. Please note any other reflections on the topic or activity.
